source: European Commission services

March 2013: Economic sentiment weakens in both the euro area and the EU

In March the *Economic Sentiment Indicator* (ESI) decreased in both the euro area and the EU, putting on hold the recovery that had started in November of last year. Sentiment declined by 1.1 points in the euro area (to 90.0) and by 0.6 points in the EU (to 91.4).

Euro area developments

In the euro area, the ESI's decline was driven by decreases in all business sectors, while consumer confidence remained broadly stable. Economic sentiment worsened in three out of the five largest euro area economies, i.e. France (-1.7), Germany (-1.6) and Spain (-0.9), while it remained broadly stable in the Netherlands (-0.3) and improved in Italy (+1.4).

The decrease in **industry confidence** (-1.2) resulted from a much more negative assessment of the current level of *overall order books* and a slightly worsened assessment of *stocks of finished products*, while managers' *production expectations* remained virtually unchanged. The *past production* and the current level of *export order books*, which are not included in the confidence indicator, were also assessed much more unfavourably. **Services confidence** interrupted the upward trend observed since October 2012, dropping by 1.4 percentage points. The decrease was the result of a marked worsening in managers' *demand expectations* and – to a lesser extent – their assessment of *past demand*, while their views on the *past business situation* remained virtually unchanged. **Consumer confidence** remained broadly stable (+0.1). Consumers were less pessimistic regarding their *unemployment expectations*, while slightly more pessimistic regarding their *savings expectations over the next 12 months*. Consumers' views on the *future general economic situation* and the *future financial situation* of their households were broadly unchanged. **Retail trade confidence** decreased (-1.5), driven by a worsened assessment of all three components: the *present business situation*, *business expectations* and (to a lesser extent) the *volume of stocks*. Also **construction confidence** decreased somewhat (-0.6), based on a worsened assessment of *order books* and *employment expectations*. **Financial services confidence** (not included in the ESI) fell by 1.1 points. While *demand expectations* improved considerably, the *past business situation* and *past demand* were assessed clearly more negatively.

Employment plans were mildly revised downwards in construction while remaining broadly unchanged in the other business sectors. **Selling price expectations** decreased in industry, while increasing in construction and retail trade and remaining broadly stable in services.

EU developments

In the wider EU, developments differed only slightly from the euro area. The overall decrease of the ESI was somewhat smaller (-0.6). On a sector-basis the reason for this difference is mainly a continued improvement in EU services confidence (+1.1) and a roughly stable development in construction (+0.3). On a country-basis, the main reason for the difference is improving confidence in the largest non-euro area EU economies UK (+1.1) and Poland (+1.7). EU financial services confidence improved marginally (+0.4).

Contrary to the euro area, employment plans in industry and services worsened, while improving in retail trade. Furthermore, selling price expectations in the EU remained stable in construction and increased in services. Consumers' price expectations, which remained stable in the euro area, decreased in the wider EU.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

Information

The European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by the Directorate-General Financial and Economic Affairs (DG ECFIN), Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.

To obtain additional information regarding these survey results you can contact the European Commission at the following addresses:

Mail: European Commission
DG ECFIN / Unit A4
200, Rue de La Loi
B-1049 Brussels

Email: ECFIN-BCS-MAIL@ec.europa.eu
