December 2015: Economic Sentiment improves in the euro area and the EU

In December, the *Economic Sentiment Indicator* (ESI) improved slightly in the euro area (by 0.7 points to 106.8) and, more markedly, in the EU (by 1.4 points to 108.9).¹

Euro area developments

Improved euro-area sentiment resulted from higher confidence in industry, which was only partially outweighed by lower retail trade confidence. Meanwhile, confidence in services, construction and among consumers remained broadly unchanged. Amongst the largest euro-area economies, the ESI rallied in Spain (3.4), increased slightly in Italy (+0.4) and remained (broadly) unchanged in Germany (+0.0) and France (-0.1). The Netherlands, by contrast, saw economic sentiment slipping (-2.4).

Increasing **industry confidence** (+1.2) resulted from managers' more optimistic *production expectations* and, in particular, improved assessments of the *current level of overall order books*. Managers' views on the *stocks of finished products* remained virtually unchanged. Of the questions not included in the confidence indicator, the assessment of *export order books* improved, while *past production* was viewed more negatively. **Services confidence** remained largely flat (+0.3), owing to moderately improving assessments of the *past business situation* and *demand expectations* being partly offset by mildly deteriorating appraisals of *past demand*. Also **consumer confidence** remained virtually unchanged (+0.2), reflecting two opposing forces: while consumers were more upbeat on questions relating to their personal finances (*expected financial situation*, *future savings*), their views on *future unemployment* deteriorated. Guesses about the *future general economic situation*, at the same time, changed only little. The sharp drop in **retail trade confidence** (-2.8) can be mainly attributed to markedly deteriorating perceptions of the *present business situation*, which coincided with a more careful assessment of the adequacy of the *level of stocks*. The *expected business situation* was assessed broadly in line with the last month. The broadly unchanged level of **construction confidence** (+0.2) reflects managers' more upbeat *employment expectations*, in combination with a worsened assessment of the level of *order books*. **Financial services confidence** (not included in the ESI) eased (-2.7) as a consequence of managers' sharply deteriorated *demand expectations* and somewhat grimmer assessments of the *past business situation*. *Past demand*, by contrast, was viewed more positively.

Employment plans saw upward revisions in construction and, to a lesser extent, services, while they remained broadly flat in industry and retail trade. **Selling price expectations** declined across the board (industry, services and retail trade), with the exception of construction managers who expected higher future prices. Consumer price expectations remained flat.

EU developments

The more pronounced increase of the headline indicator for the EU (+1.4) owes to improved readings in the largest non-euro area economy, the UK (+2.9). By contrast, sentiment in Poland eased (-1.0). Sectoral developments differed from the euro area in so far as services, consumer and construction confidence firmed, rather than remaining flat. By the same token, instead of weakening, financial services confidence remained largely flat. Deviating from the euro area, EU employment expectations increased in industry, while they dropped in services and retail trade. EU price expectations diverged from the euro area only in the services and retail trade sector, which posted upward revisions.

¹ The business confidence indices for France were slightly revised compared to the November press release, causing a downward revision of a decimal point for the EU ESI (to 107.5).

In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

The economic sentiment indicator is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). Its long term average (1990-2014) equals 100. The reported ESI average is based on this standardisation sample. All confidence indicators are balances.

The country weights have been updated in January 2015.

(a) Business surveys for Ireland have been temporarily discontinued as from 05/2008.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

Information

The Directorate-General Financial and Economic Affairs (DG ECFIN) of the European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by DG ECFIN's Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.
